

Restriction of Hazardous Substances RoHS Compliance Statement (RoHS2 EU Directive 2011/65/EU)

Feb 1, 2013

RoHS2 (EU Directive 2011/65/EU) is a directive adopted by the European Union that restricts the use of certain hazardous substances in electrical and electronic equipment (EEE) by specifying the maximum concentrations of six hazardous substances that can be present in EEE. The directive seeks to limit the possibility of these hazardous substances leaching out and polluting the environment during end-of-life recycling or disposal in landfills.

RoHS2 Substance List

Substance	Maximum Concentration in Homogeneous Material
Lead (Pb)	1,000 ppm (0.1%)
Mercury (Hg)	1,000 ppm (0.1%)
Cadmium (Cd)	100 ppm (0.01%)
Hexavalent chromium (Cr(VI))	1,000 ppm (0.1%)
Polybrominated biphenyls (PBB)	1,000 ppm (0.1%)
Polybrominated diphenyl ethers (PBDE)	1,000 ppm (0.1%)

The vast majority of Transko's products meet this requirement. The following is a list of our products with the RoHS compliance status. There are a few exceptions for legacy products which can be found in the exceptions list below.

CRYSTAL
